

WHAT BIG BROADBAND COMPANIES DON'T WANT APARTMENT RESIDENTS TO KNOW

THE DETAILS

What we are going to tell you might come as a shock but we have all the answers to help you solve these problems!

You see, not all companies are honest, they don't always want to tell you about your precious internet connection.

I mean where would we be without the internet? No Netflix, No Online Gaming, No Facebook and No Instagram - Yep, pretty bleak, even brings a little tear to my eye!

It's the first thing we check in the morning and last thing we look at before going to bed. It's hard to fathom life without it! Imagine having to wait weeks with no internet. 🤔🤔🤔

Sad truth is, big broadband companies let this happen and more! This is what they don't want you to know when you're looking to buy a plan:

WITH OTHER ISPS:

GETTING ONLINE TAKES FOREVER BE PREPARED WATCH PAINT DRY!

On average, internet customers can wait 10 to 60 days to get online!

SPEEDS ARE SLOW, LIKE REALLY SLOW!

Most Australians typically get 10mbps upload and 5mpbs download speeds. Caution – be prepared to buffer when streaming!

THEY'RE EXPENSIVE! DON'T MAKE PLANS TO GO OUT THIS WEEKEND!

Other ISPs charge high connection, installation, modem and monthly fees!

Shocking right?

We have heard people go months without internet because their ISP mucked them around!

In most cases, Freedom Internet is pre-installed and ready for you to connect on the day you move in so no need to watch paint dry! If you're a customer you can expect fibre speeds – up to 100mbps!* So turn on Netflix and settle in!

And last but not least, you can make plans this weekend because we'll save you money with our affordable plans!

**Well, what are you waiting for?
Check if your apartment has Freedom available today –**
